

Our team has been placing Dental Implants for years now. We use them to: stabilize flopping dentures & replace single or multiple teeth.

We want everyone to have a complete set of teeth to effectively chew and bite. Implants have become more than something to replace function. They look beautiful! We offer Implants at a price that is completely affordable and easy.

For a limited time we are offering

25% off

(Any Implants not covered by insurance)

Do you know someone with a missing tooth?

Are YOU Missing a tooth/teeth?

**Implants.....
the perfect solution**

MSD
MARK S. DEVUYST DDS

DID YOU KNOW????

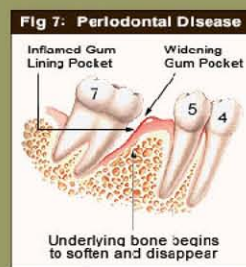

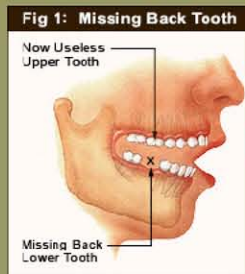

- ★ An Implant is easier to put in than taking out a tooth.
- ★ It takes less time than a cleaning with Lindsey
- ★ They last a lifetime
- ★ We offer monthly payments w/ NO interest
- ★ You can sleep while we work:
Oral Sedation (NO EXTRA CHARGE)

Replacement of a single tooth

If you are missing a tooth or have a tooth that needs to be extracted, you can replace it without grinding down healthy teeth to support a conventional bridge. Implants replace both root and crown structure of the particular tooth.

One missing tooth can cause many other problems (see Below)

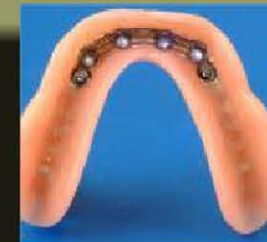

At this point 2 other teeth are effected and may need to be extracted

OVERDENTURES

Replacement of full upper or lower teeth (Patients who need dentures)

When you have a situation where you may need full dentures you may choose to restore your function with Dental implants. Many times when you will or have been wearing dentures the bone shrinks and the dentures become loose and do not function as normally as they could. In this case implants are a great way to replace structure and function of teeth.

Bite into those apples again!
