Who doesn't eat steak?

Hopefully you are able to indulge in a piece of steak every now and then. Did you ever realize that there are people that can't eat steak. No, not because they don't like it.....**Because they can't chew it!**

For years people with Dentures and even Partial Dentures could not eat as they once did. When teeth are lost they are replaced with these prosthetics. Sometimes poor fitting, sometimes loose and all the time **REMOVABLE**. Removable meant: that they could come loose or even out when you don't want them to; They could rock and move while you are trying to eat. **NOT ANYMORE!** The wait for that steak has ended.

With Dental Implants a quick, painless procedure will stabilize your denture/partial and give you the function of If you have a denture or partial, please know there are solutions. Please read the article on back for more details.

FREE

Have you ever talked to a friend and wished that they could get our opinion about a dental problem or question.

Now they can-
For **FREE!!!!**

Hot Cinnamon Toast

My dentist for life, your dentist for life.

Introducing....

Free Friends and Family Night

Excellent dental care is our priority! For our patients and others we feel that it is also a necessity.

Many people have reservations about treatment or changing Dentists for fear of the unknown. Well, now you can bring anyone to our office for an hour consultation with Dr. DeVuyst- FOR FREE.

Starting November 1st, the first Tuesday of each month will be reserved for these free consultations.

**You are encouraged to come along.
Enjoy the extra refreshments and goodies that night.
The special "Thank You" goodies & gifts will make it worth it!**

Don't miss this opportunity.....

**DO YOU KNOW SOMEONE WITH A PARTIAL OR DENTURE?
DO YOU HAVE A PARTIAL OR DENTURE?
DO YOU LIKE THAT YOUR TEETH "COME OUT"?**

Confidence in Public

Those who opt for implant supported dentures are more confident when they talk, laugh, and eat in public. Because they don't have to worry about their false teeth slipping or falling out while they are eating or talking. Also, they are less likely than conventional dentures to interfere with normal speech.

Improved Comfort

They are secure and feel like normal teeth. People who have decided to undergo the denture implants procedure do not have to cope with sores that can be caused by conventional dentures. The palate is not covered by implant dentures so they feel "normal". It is uncomfortable when your tongue hits denture material instead of your palate. Also, since implant supported dentures are held firmly in place by the implants, there is no danger of the discomfort caused by loose dentures sliding around in the mouth.

Better for eating

Conventional dentures only provide about 20% eating efficiency. Many people have to take out their conventional dentures before they eat. **NOT WITH IMPLANT SUPPORTED DENTURES**

The Implants integrate for stability, allowing you to bite and chew naturally
